GLASSTECH

INTRO DUCTION

CLV Glasstech, established in 2020, is a proudly Malaysian brand specializing in custom glass and mirror designs, driven by a passion for creativity and innovation. Through our strategic partnership with Lien Yeu Glasstech (M) Sdn Bhd a globally recognized glass manufacturer with over 50 years of expertise we combine modern design sensibilities with trusted, high-quality production standards. Today, CLV Glasstech is known as Malaysia's go to brand for bespoke glass and mirror solutions, proudly living up to our tagline: "Reflection of Creativity."

Our One-Stop Solution simplifies the journey from concept to completion by offering a comprehensive range of services including consultation, custom design and technical drawings, on-site measurement, precision manufacturing, delivery, installation, and after-sales support. Whether for residential or commercial projects, we manage every step under one roof ensuring quality, efficiency, and excellence at every stage. Let us take your space from 0 to 100, seamlessly.

BALCONY

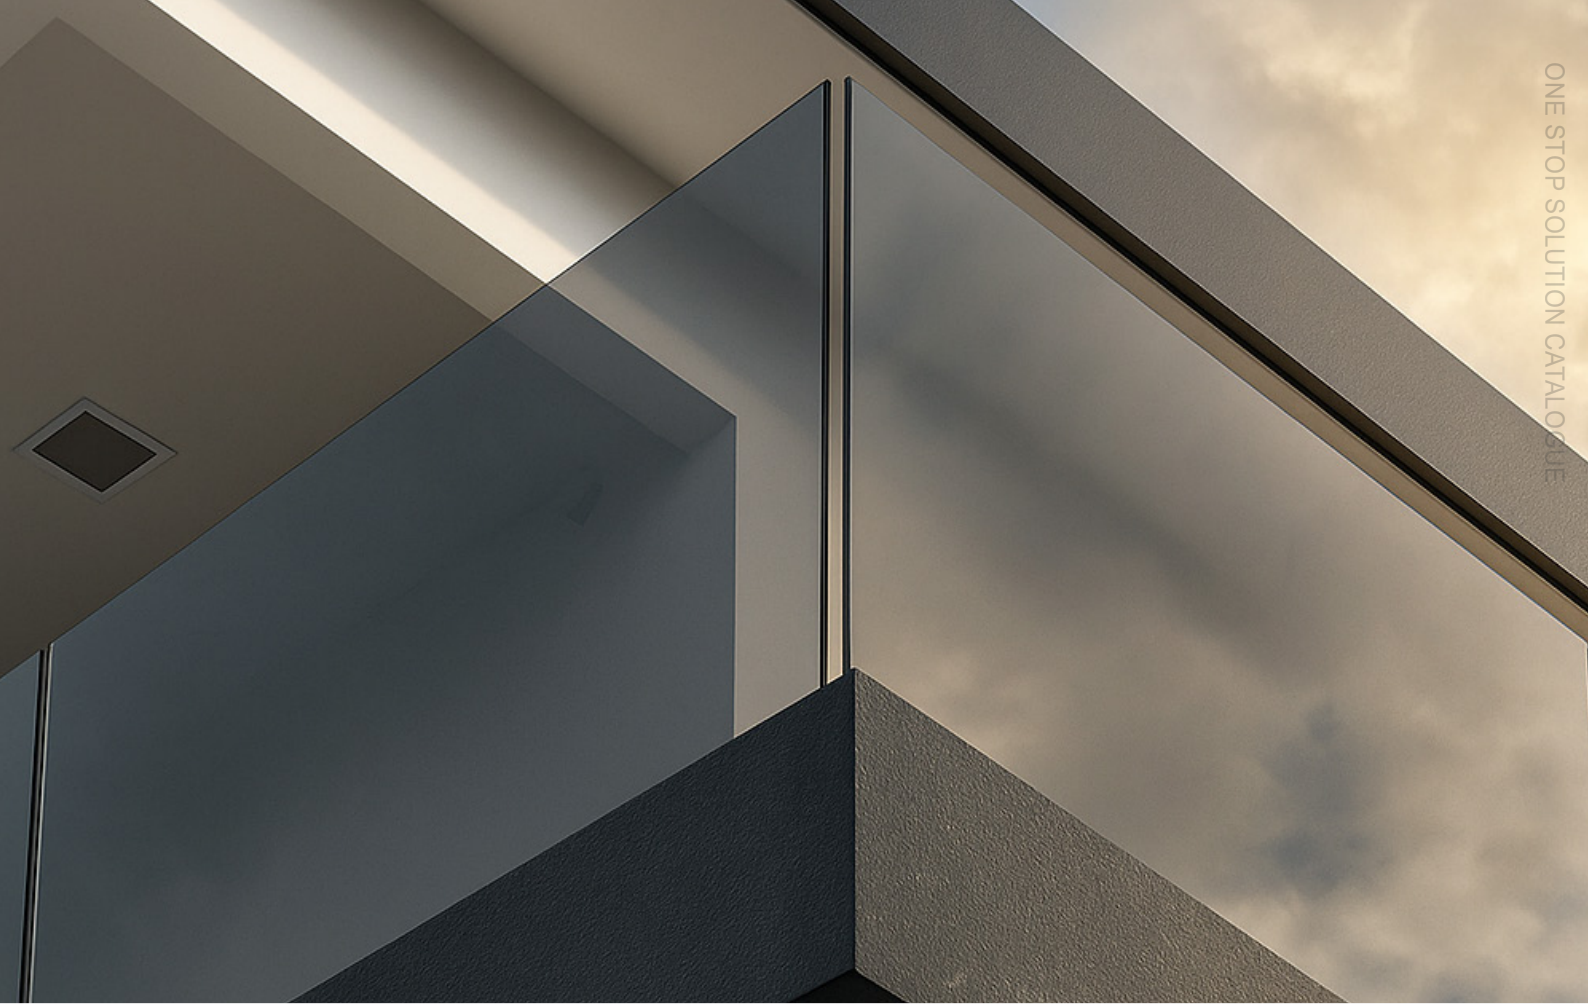

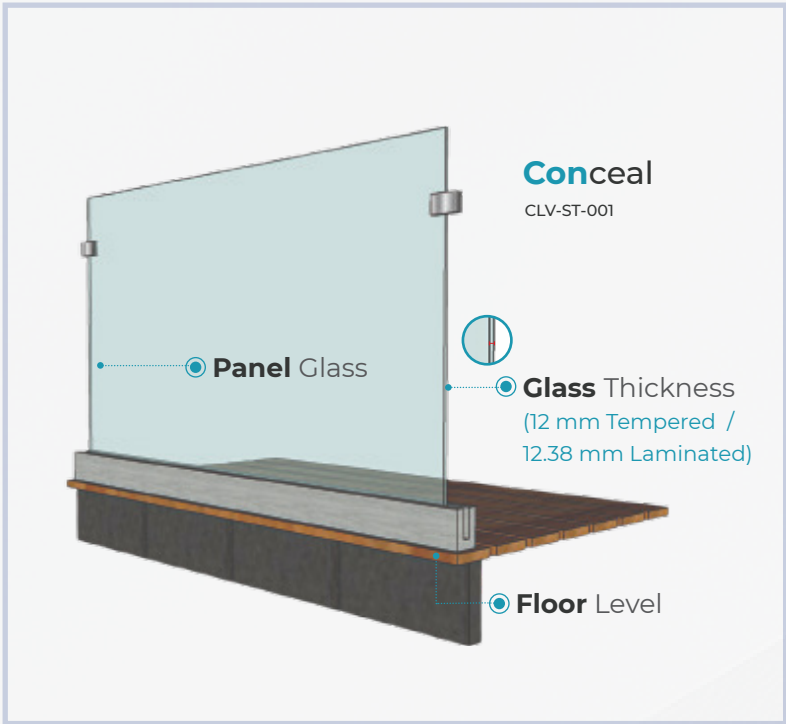

The Glass Balcony System enhances outdoor spaces by combining safety with refined aesthetics. Designed to provide clear, open views without compromising protection, it seamlessly integrates into any architectural or interior concept through frameless, partially framed, or fully framed configurations.

Engineered for strength and visual lightness, the system uses performance powder - coated aluminium and is adaptable in height, style, and materials making it suitable for both residential and commercial applications. Its minimal design increases the value and visual impact of any property, while offering long-term durability in exterior environments.

Multiple finishes are available for aluminium frames, hinges, and hardware, with a choice of aluminium, wood, or stainless steel handles, allowing the system to be tailored to suit a wide range of design needs and personal preferences.

SAFETY WITH STYLE

Transparency with Strength.

Our Stair Glass System provides secure handrail support while enhancing the architectural elegance of any space. Ideal for both residential and commercial settings, it delivers clear, open views while maintaining a strong and safe barrier for staircases.

Designed to integrate seamlessly into any interior, the system is available in frameless, partially framed, or fully framed options. Choose from a variety of powder-coated frame colours, hinge types, and hardware finishes, along with wood, aluminium, or stainless steel handles to suit your layout and site conditions.

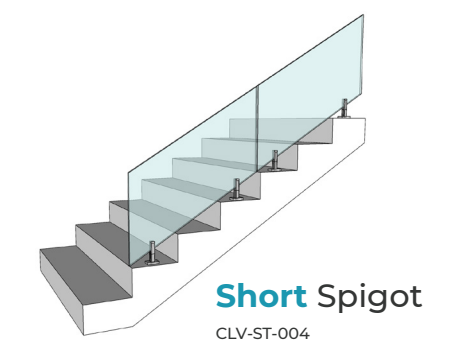

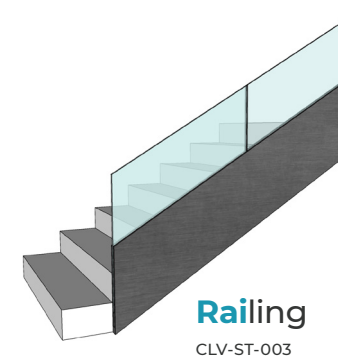

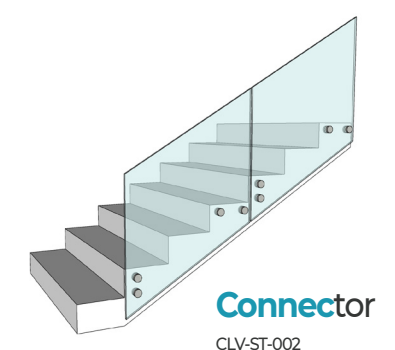

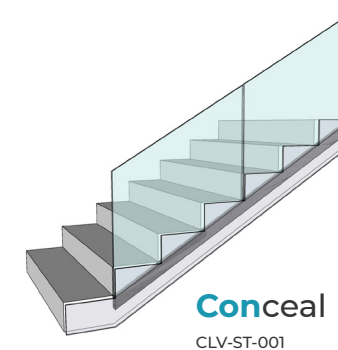

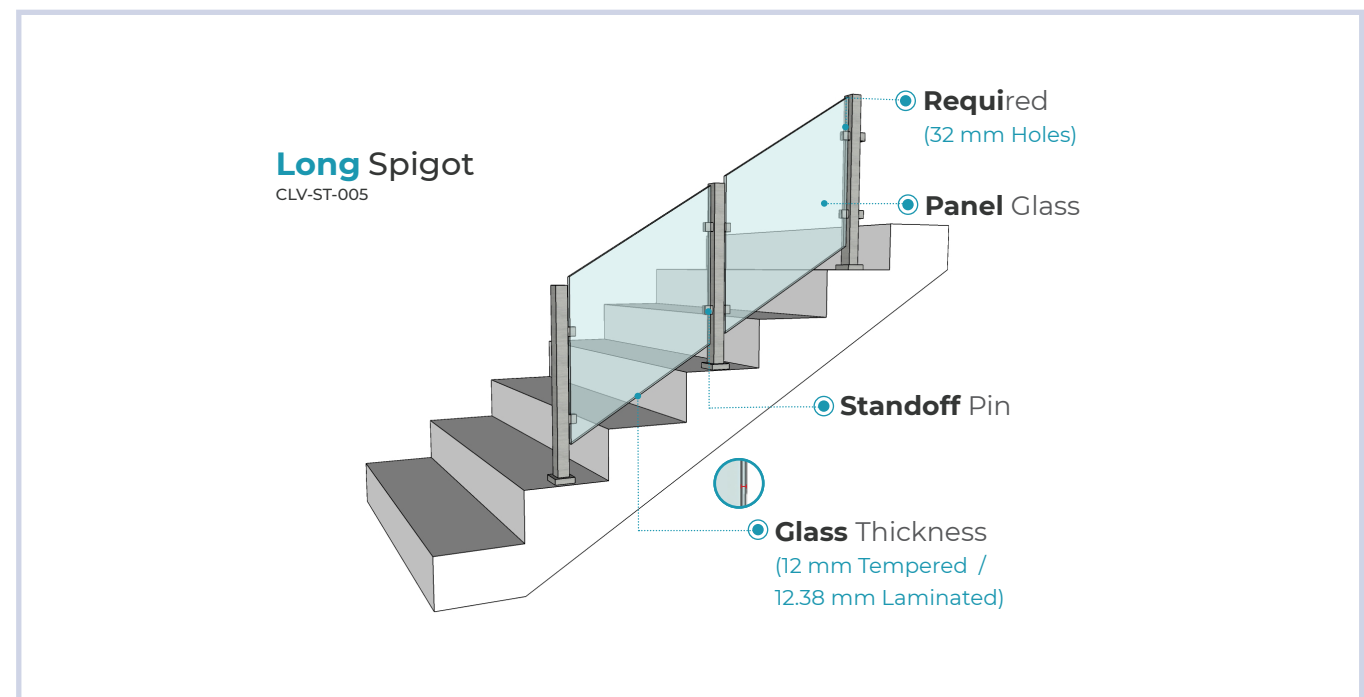

All components are fully customisable to meet both aesthetic and safety requirements

SHOP FRONT

Create a lasting first impression with our fully customizable shopfront glass. Designed for durability, safety, and maximum visibility, our solutions combine modern aesthetics with practical performance perfect for retail and commercial spaces.

SHOP FRONT (CLV-SF)

Framing Light with Strength and Clarity.

Our Fixed Window Panels are designed to deliver uninterrupted views, enhanced natural lighting, and long-term performance. As part of our complete window system, each panel integrates with performance aluminium framing with Grade A material glass combining architectural elegance with energy efficiency and security.

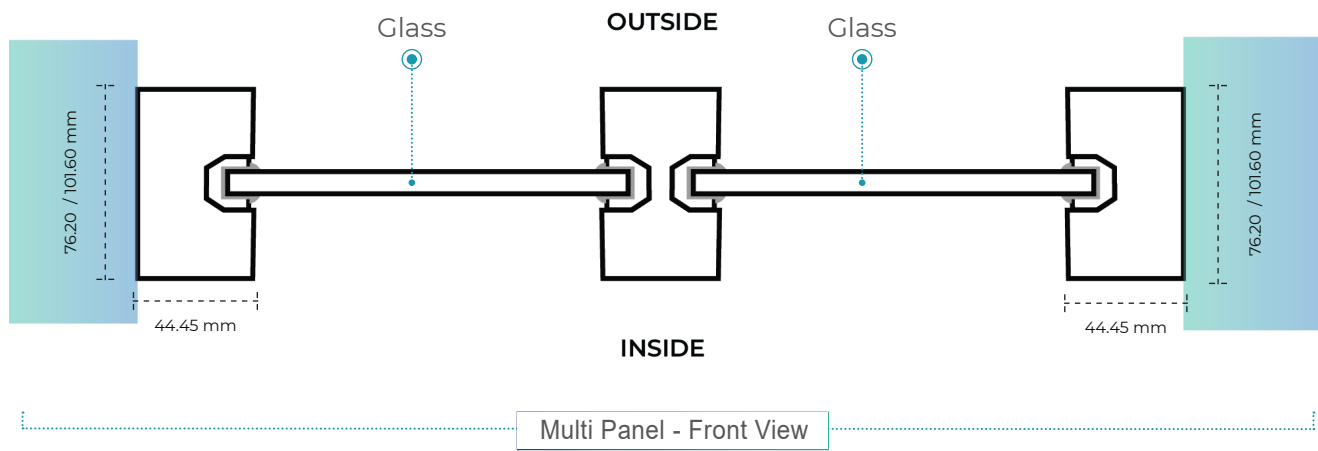

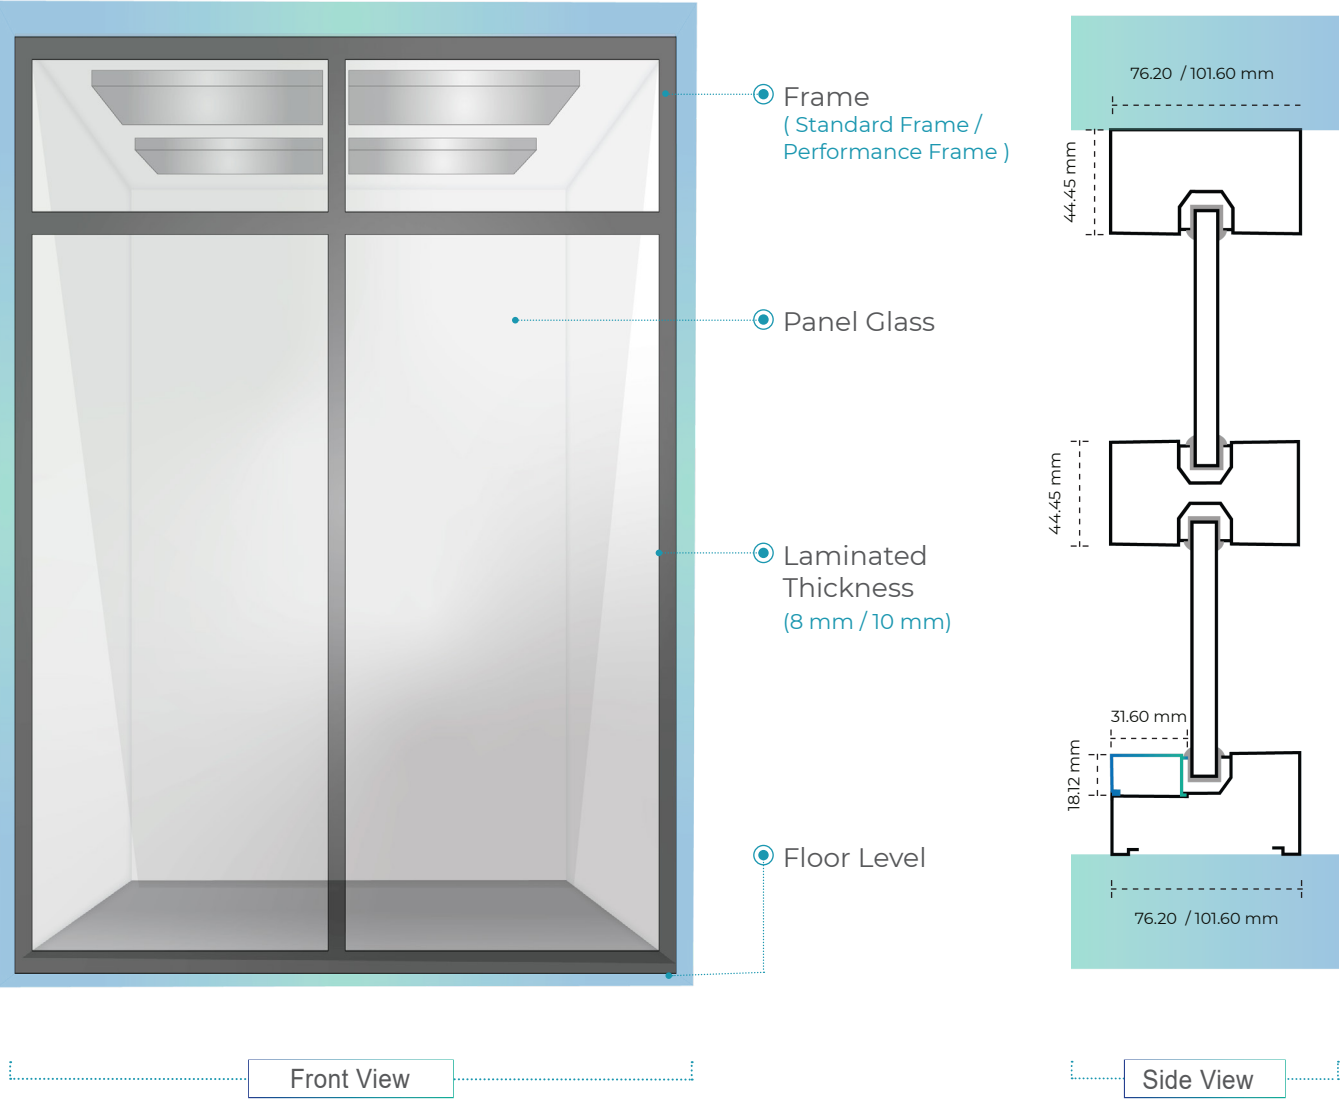

Available with tempered, laminated, or tempered laminated glass, these panels offer strength, safety, and visual clarity. For exterior use, we utilise performance grade aluminium for superior durability and weather resistance.

DOOR SYSTEM

From swing and pivot to sliding and folding, our door systems are fully customizable with premium glass, hardware, and aluminium. More than just entryways, each design turns glass into the main feature blending function, quality, and creativity.

TIMELESS MOVEMENT.

Refined Framing.

The Interior Glass Swing Door features one or more panels that pivot on hinges, swinging inward or outward to create a generous, open passage between spaces. Ideal for both residential and commercial settings, it blends functionality with timeless design to suit a wide range of architectural styles. The system supports framed or frameless configurations, with the framed version built using a slim aluminium profile that delivers a clean, minimal look without compromising durability. In addition to offering smooth operation and wide openings, the use of glass panels allows for increased natural light and a sense of openness between zones. Fully customisable in layout, frame finish, and glass type, the swing door offers both practical performance and modern elegance.

Customisation Available

Choose from a range of glass types, panel designs, and aluminium finishes to tailor your partition system to your space and design vision.

EXCLUSIVE HARDWARE

EXCLUSIVE HARDWARE

Our premium hardware series including hinges, stoppers, and handles is crafted from corrosion resistant zinc alloy. Designed for both strength and style, it ensures lasting durability while enhancing the aesthetic of every swing door.

SIGNATURE HANDLE

Engineered Elegance. Functional Precision.

This signature handle is a refined blend of minimalist design and advanced engineering, serving as both a tactile element and a visual highlight within any interior. Crafted from durable zinc alloy, it is available in five premium finishes: Matte White, Misty Grey, Graphite Black, Dubai Grey, and Espresso Brown, offering versatile pairing options for a wide range of door frames and interior styles.

The surface can be treated with electroplating or spray coating, ensuring exceptional durability and a smooth, lasting finish. Internally, a bi-directional spring mechanism provides smooth, consistent rebound, while its non-handed design allows for flexible installation on both left and right openings. For added safety and convenience, the handle includes an anti-force feature that enables downward movement even when locked, and a discreet panel-press function that conceals the key slot for a seamless look until access is required. Ideal for residential or commercial use, it brings together sleek form and dependable performance.

EFFORTLESS MOVEMENT

Iconic Design.

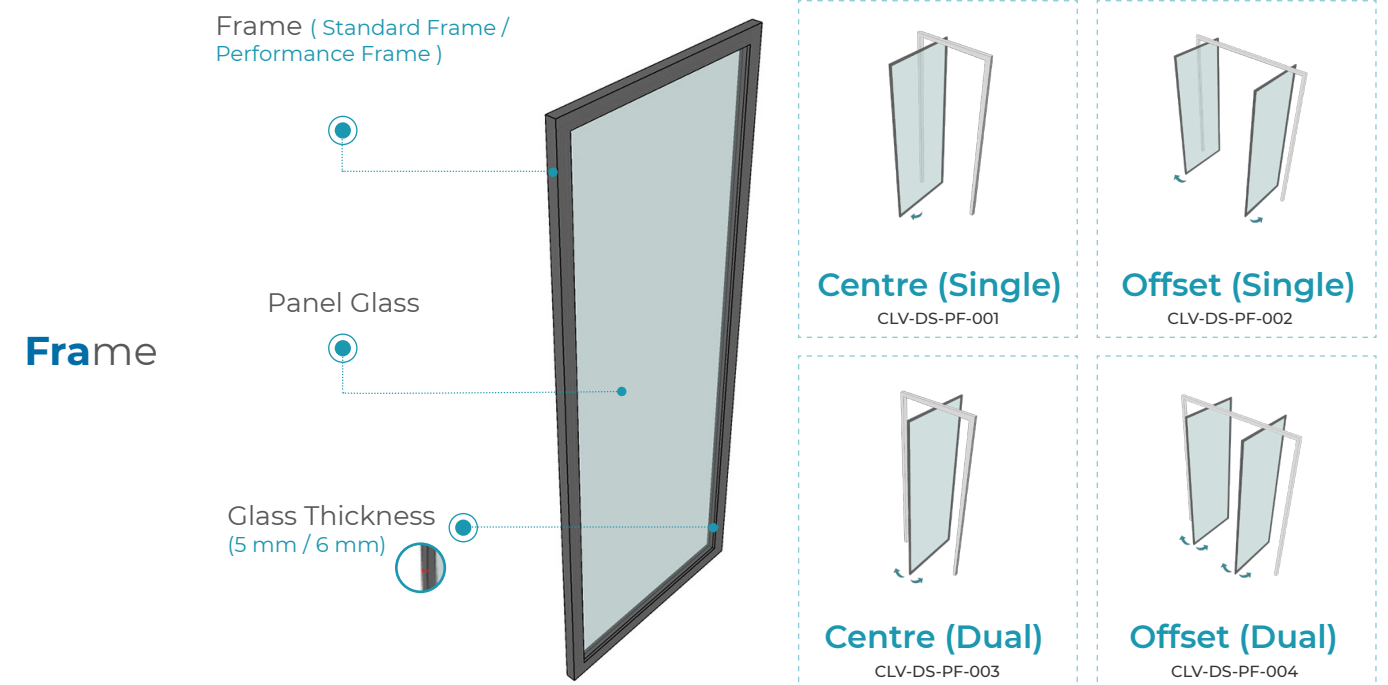

The Pivot Door is a modern architectural statement, rotating on a central pivot point instead of traditional side hinges. This innovative mechanism allows the door to open in both directions, offering smooth, effortless operation especially with larger panels. Unlike standard swing doors, pivot doors provide a wider, more flexible opening depending on the space and design layout, making them ideal for feature entrances or expansive transitions. Suitable for both residential and commercial use, pivot systems bring together function and form with sleek glass panels that enhance natural lighting and spatial flow. Available in framed or frameless options with a variety of finishes, the pivot door delivers distinctive character and understated luxury to any environment.

MODERN FLOW

Light-Filled Simplicity.

A Glass Sliding Door is a timeless, space-saving solution that effortlessly connects interiors while maximising natural light.

Designed for both residential and commercial settings, it features one or more panels that slide horizontally along a track, offering smooth access and a clean, modern aesthetic. Available in standard or telescopic multi-panel configurations, this system allows for wider openings and flexibility in layout. Clients can choose between a barn-style exposed track for a bold statement or an invisible track system, where the rail is concealed within the wall for a seamless, minimalist finish. Framed in slim aluminium profiles, the door maintains a lightweight look while ensuring structural strength. With options to customise system type, frame finish, and glass selection, the glass sliding door adapts to any design need with effortless elegance.

FUNCTIONAL FLEXIBILITY

Effortless Elegance.

This is a space-efficient and stylish solution for wide openings. Composed of multiple glass panels that fold and stack neatly to one or both sides, it creates a smooth, unobstructed transition between spaces ideal for both interior and exterior applications.

Built with top and bottom track support for enhanced stability, the system is available in framed or frameless designs, with powder-coated aluminium for a durable and modern finish. Its compact stacking configuration makes it an excellent choice for maximising usable space in areas with limited clearance.

Available in various glass types and finishes, the system can be tailored to suit different layouts and design preferences.

PT (SLIDE & FOLD) DOOR (CLV-DS-PT)

Designed for flexible, multi-functional living, our PT (Slide & Fold) Door features multiple glass panels that slide and neatly fold to one side, allowing an entire space to be opened up or closed off within seconds. It creates a seamless transition between areas while maintaining a sense of openness, natural light, and uninterrupted views perfect for modern homes and commercial spaces that demand adaptability.

Built with a precision-engineered track system, the panels glide smoothly, quietly, and securely. Each door is fully customisable, from panel configuration and dimensions to glass type and hardware finish. Available in tempered, laminated, tinted, textured, or smart film glass options, the PT Door combines safety, durability, and refined aesthetics in one elegant solution.

WINDOW SYSTEM

Our casement and sliding windows are designed to fit seamlessly into any layout. With a variety of frame styles and fully customizable glass and hardware, each system balances functionality with modern design flexibility.

SMART DESIGN.

Lasting Performance.

Our window systems combine natural light, ventilation, and security in one seamless solution. For exterior use, we use performance-grade aluminium for enhanced durability and weather resistance. Glass options include tempered, laminated, or tempered-laminated glass to ensure safety and strength.

Sliding window systems are perfect for maximising space and minimising visual barriers. Tracks can be concealed within walls for a sleek finish, with different system options available to suit various site layouts and create wide, open views.

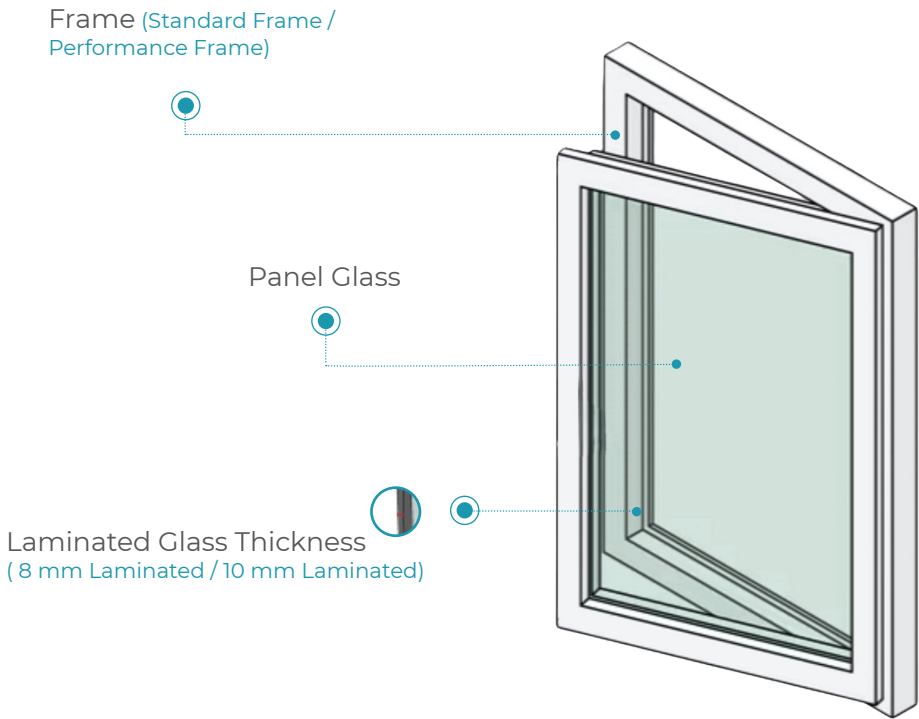

Customisation is available for glass type, frame finish, colour, and hardware to fit any design or functional need.

SHOWER SCREEN

Designed to elevate bathroom spaces, our shower screens combine premium glass with high-quality stainless steel accessories. Offering both style and functionality, each system delivers a clean, modern look with lasting performance.

FIXED SHOWER SCREEN

Minimal Form. Maximum Function.

The Fixed Shower Screen Panel offers a timeless and modern solution for separating wet and dry zones in the bathroom. With its streamlined, stationary design, it eliminates the need for bulky hardware or curtains, creating a clean, open, and uncluttered look. Ideal for enhancing spatial flow in compact areas, the fixed glass panel also contributes to safety by effectively containing water and reducing the risk of slips. Unlike fabric alternatives, glass dries faster and resists mold and mildew, making it a low-maintenance, hygienic choice. Customisable in size, finish, and glass type, it's a practical yet stylish upgrade for any bathroom interior.

FRAME & FRAMELESS

Frame The framed fixed shower screen panel offers a clean, structured solution for modern bathrooms, combining durability with visual clarity. Built with a slim aluminium profile, the frame is directly mounted to the wall for maximum stability and long-term performance. The aluminium is powder-coated for strength and resistance to moisture, and can be customised in a wide range of colours to suit any bathroom aesthetic. This framed option not only separates wet and dry zones effectively but also enhances the space with sleek, geometric lines making it both practical and visually balanced.

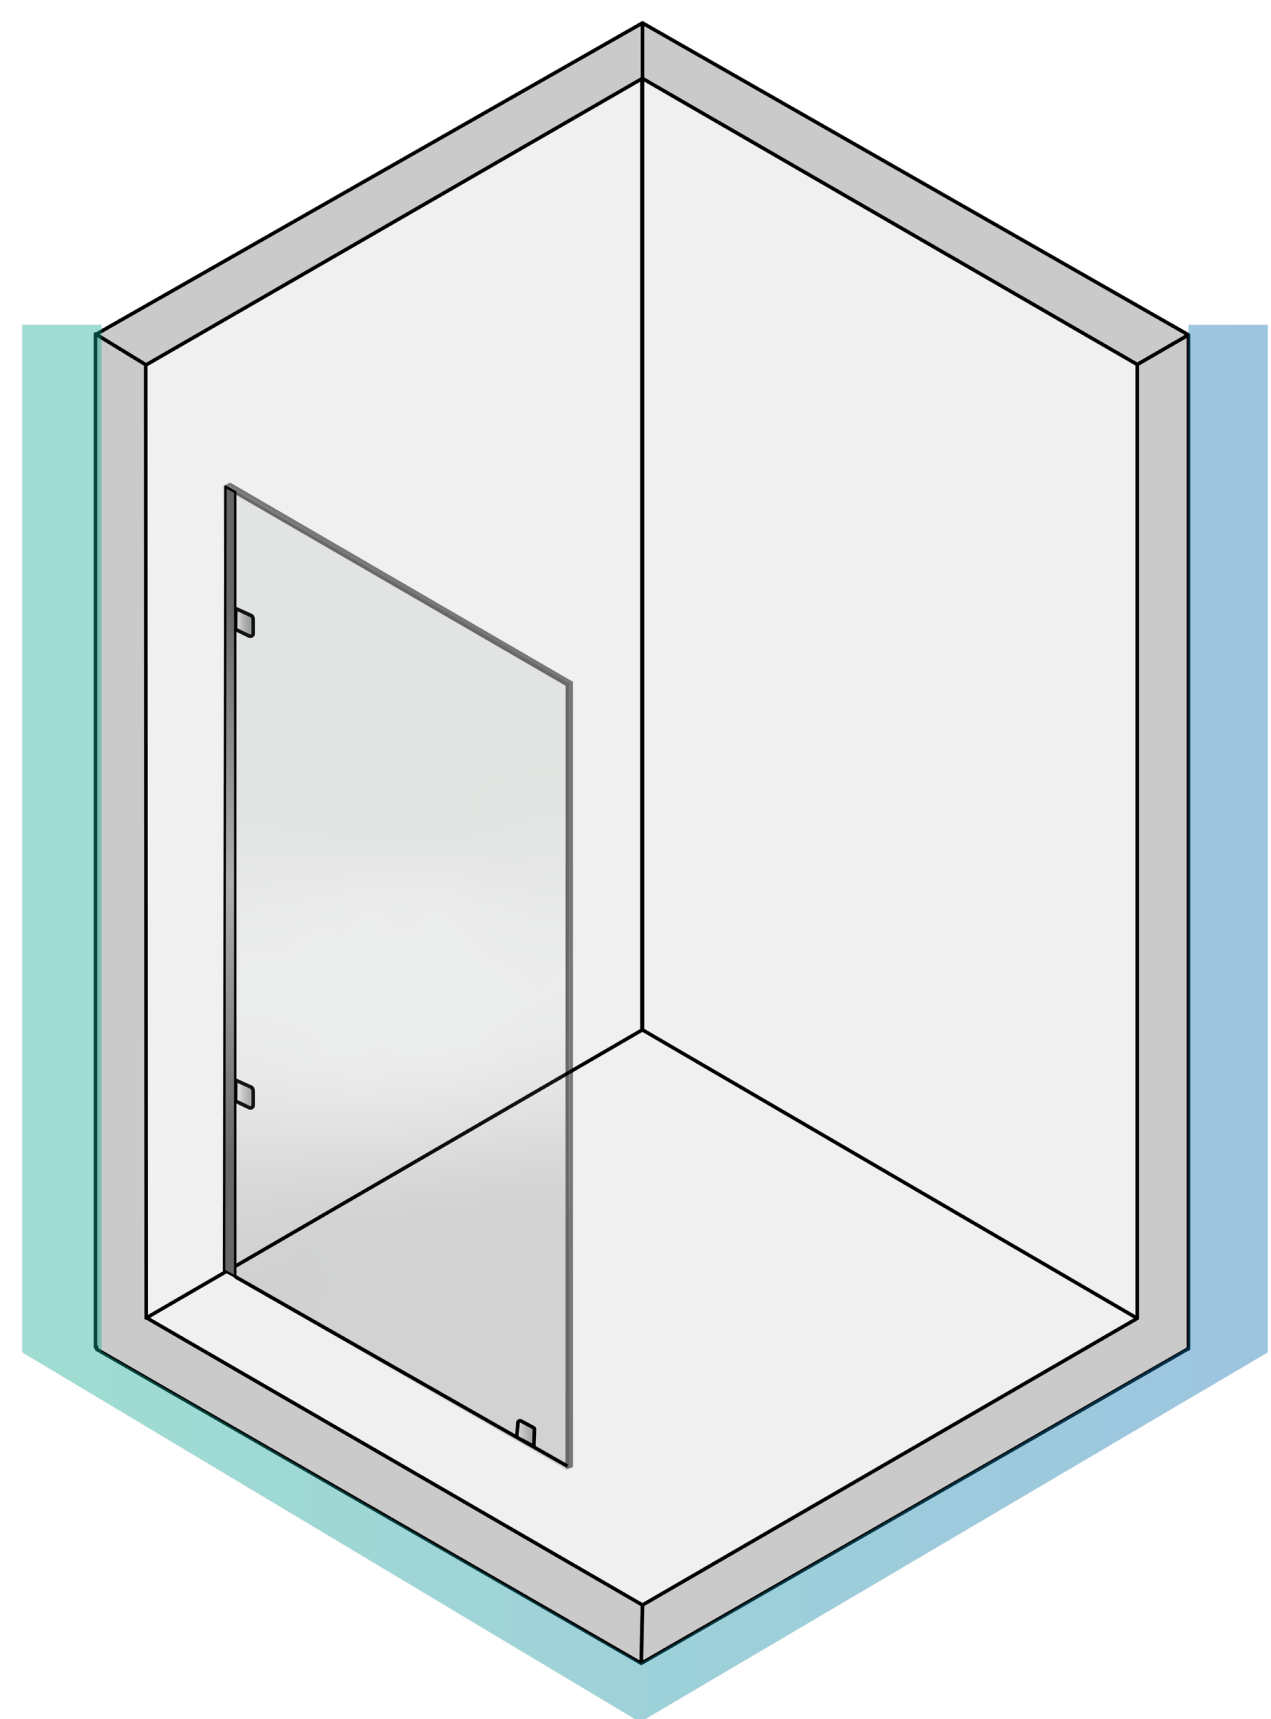

Frameless The frameless fixed shower screen panel delivers a sleek, uninterrupted look that elevates the modern bathroom. Without a frame, the design feels open and spacious, acting as an elegant divider between wet and dry areas. The panel is held in place using glass clips discreet hardware that secures the glass to the wall or floor, and connects multiple panels when needed. These stainless steel clips ensure structural stability while maintaining the clean visual line of the glass. Available in multiple colour finishes beyond standard stainless steel, the clips add a subtle design element that can be tailored to the overall interior style. Frameless panels are the perfect choice for achieving a minimalist, high-end aesthetic with practical day to day functionality.

COMBINATION SHOWER SCREEN

Flexible Function. Seamless Integration.

The Combination Shower Screen offers a smart and versatile solution for bathrooms that require both flexibility and elegance. This system blends fixed and movable glass panels, allowing for various opening mechanisms that adapt to your specific layout and space constraints. It's ideal for maximising usable space in compact bathrooms while maintaining a clean, modern aesthetic. Easy to maintain and resistant to mold, the glass surface is hygienic and simple to clean with just soap and water. By clearly separating wet and dry areas, it also enhances safety and reduces slip hazards. With its modular flexibility, this screen can be tailored to suit different configurations, offering a stylish and space - enlarging upgrade to any bathroom.

COMBINATION DOOR

Shower Screen System

The Slide and Fold System combines sliding and folding motion into one sleek mechanism, allowing multiple glass panels to glide and stack neatly to the side w ideal for compact bathrooms seeking a wider, more accessible opening. Perfect for minimalist spaces, this system features a slim aluminium track profile, with customisable glass options and hinges and clips available in various default colours to match any design

SPLASHBACK GLASS

Stylish and practical, our kitchen backsplashes come in a wide range of colours or custom graphic designs. Heat-soak treated for durability and heat resistance, they offer an easy - to - clean surface that combines everyday functionality with modern elegance.

SPLASHBACK GLASS

Clean Lines. Bold Impact. Seamless Hygiene. (CLV-SG)

A glass splashback brings a modern, seamless finish to any kitchen while delivering practical benefits that enhance everyday use. Unlike traditional tiled surfaces, glass provides a grout-free, non-porous surface that resists moisture, stains, bacteria, and grime making it both hygienic and easy to clean.

Our signature artistic printing glass replicates the luxurious look of natural marble, offering a sophisticated design upgrade without the cost and maintenance of real stone. With its smooth finish and bold visual presence, the glass splashback is a functional and stylish solution that elevates both the aesthetics and performance of your kitchen space.

CABINET DOOR

Enhance cabinetry with our wide selection of customizable glass options. From frosted to textured finishes, each design offers a unique way to showcase or conceal storage while adding a touch of elegance to kitchens, wardrobes, and living spaces.

CABINET DOOR (CLV-CD) Functional Storage. Elegant Display.

Our glass cabinet doors combine practicality with visual appeal, transforming ordinary storage into a feature element of your space. Whether used in kitchens, wardrobes, or living areas, they offer a stylish way to store and showcase items while maintaining a clean, organised look. Customisable to fit any cabinet design, glass doors enhance visibility, reflect light, and help create a more open, spacious atmosphere. Ideal for those who want the beauty of open shelving without the dust, these doors provide the perfect display solution. Made from durable, easy-to-clean glass, they're especially convenient in high-use areas like kitchens, where surfaces need to stay spotless with minimal effort.

MIRROR

From framed to frameless, LED vanity to smart functions, our mirrors are crafted with the highest quality standards and fully manufactured in our local factory. Each piece comes with secure wood-box packaging and a one-to-one exchange guarantee for peace of mind.

FRAME & FRAMELESS

Timeless Simplicity. Tailored Sophistication.

Our framed and frameless mirrors offer a balance of minimalist elegance and refined craftsmanship ideal for elevating any interior, from modern homes to commercial spaces. Whether you prefer the bold definition of a slim aluminium frame or the clean, uninterrupted lines of a frameless design, each mirror is fully customisable in shape and size, thanks to our precision cutting technique using advanced machinery. Designed to reflect not only light but style, these mirrors serve as both functional essentials and statement pieces. The result is a mirror that's simple in concept, yet powerful in presence made to suit your vision with effortless sophistication.

LED VANITY MIRROR

Precision Lighting. Elevated Design.
Guaranteed Quality.

Our LED Vanity Mirrors are designed to enhance both space and light, creating a functional focal point that makes a bold design statement in any area desired. Crafted from 4mm to 8mm Grade A mirror material, each piece offers clarity and durability while resisting fog for a consistently clear reflection. Built with care and technical precision, every mirror includes CE & RoHS certified LED components, scratch-resistant stickers, and is packaged in a sturdy wooden box to ensure safe delivery. Backed by a 1-year warranty, and engineered with attention to every detail, this mirror combines elegant form with lasting function – an everyday essential with professional-grade performance.

SERVICES

We go beyond products with advanced coating technology that protects glass from stains and marks. Backed by a 10-year warranty, our services are designed to keep every installation looking new for longer.

**Enduro
Shield**

ENDURO SHIELD

Long-Lasting Protection.
Effortless Cleaning.

CLV's EnduroShield Coating Service uses Australia's advanced X-Line nano coating system to apply a durable, invisible layer to both sides of the glass. This coating repels water, oil, and grime making surfaces up to 90% easier to clean and reducing the need for harsh chemicals. Ideal for both interior and exterior use, it protects against stains, corrosion, UV damage, and etching, while maintaining the glass's natural clarity. Lab-tested to last up to 10 years, it's a smart upgrade for shower screens, facades, balustrades, and more.
