

Normal Sliding Door

Normal Sliding Door

A normal glass sliding door is a stylish, functional choice for homes and businesses. It features glass panels that slide horizontally on a track, seamlessly connecting spaces and enhancing natural light with a modern look.

Space Saving

Folding and Sliding doors can be moved around in different ways and organise in compact spaces such as behind a wall.

Flexibility

With different systems, these doors can be custom made into different layouts, functions and sizes, fitting into any space or area required.

Maximize Space

Expand the area and connect between two spaces by opening the movable doors.

Easy Access

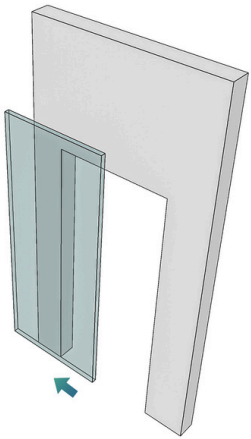

The smooth sliding mechanism allows for effortless opening and closing, providing convenient access to different areas.
