Pivot Door

Pivot Door

A pivot door is a modern, innovative door design that rotates on a central pivot point rather than traditional side hinges. This unique mechanism allows the door to swing open in both directions.

Numerous Applications

From residential to commercial areas, custom glass doors almost can be applied anywhere.

Maximize Space

Expand the area and connect between two spaces by opening the movable doors.

Natural Lighting

Glass doors can allow more natural light enters the room compared with other materials.

Classic Design

Pivot doors offer timeless elegance to any space.

Smooth Operation

The central pivot allows for effortless opening and closing, even with larger doors.

Unique Design:

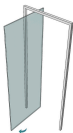

Pivot doors stand out as a distinctive design feature, adding a touch of luxury and sophistication.
